

Diamond Tuff®

Floor Care

Being a Laminate, Diamond Tuff® is very resilient when it comes to wear and tear and maintaining a Diamond Tuff® floor is incredibly simple. The following maintenance checklist will help to ensure that your Diamond Tuff® floor always looks its' very best.

- Use walk off mats at all entries to reduce the amount of dirt and grit that is brought inside on to the floor.
- Place felt pads on the legs of tables and chairs and on the bases of any movable furniture that is likely to scratch the surface of the floor.
- Ensure that your floor is kept clean and free of grit by using an electrostatic mop to keep your floor clean.
- Spot clean when necessary with a UTF approved Timber Flooring Cleaner
- Periodically, you will need to wash your floor. Use warm water with a UTF approved Timber Flooring Cleaner. Ensure you use only a clean, well-wrung mop (It is important that the mop has not been used with any other cleaning products or detergents as this will leave smears on the floor).

Cleaning products that are suitable for laminate floors should be used to maintain your Diamond Tuff® Laminate Floor. We recommend Unika Cleaning products.

Warranty
